

04 Module Specifications

Knowledge & Evidence Layer

Collects, validates and structures evidence. Output: Validated Evidence Package.

Intelligence Layer

Transforms validated evidence into a Decision Package using thesis building, six pillars, materiality, trade-offs, committee review and self-critique.

Decision Communication Layer

Transforms the Decision Package into a Trust Package with beginner/expert reports, explanations and traceability.

Experience Layer

Presents the Trust Package through search, progress visualization, report exploration and export without altering reasoning.
